

V880

High energy 4000 gauss field

Fast, reliable conveyor system

Erases cassettes and cartridges

Powerful dual "V" configured coils

Easy to use

The V880 has been designed to bring efficient erasing of high energy cassettes and cartridges in a conveyor degausser at an affordable price.

The conveyor transportation system of the V880 ensures that media is completely erased in an easy-to-use manner. Extra security of erasure can be achieved by use of the optional belt cover, ensuring that media cannot be removed from the conveyor belt until it has passed completely through the erasure field.

The cassettes are placed onto the moving conveyor belt and carried over two degaussing coils which are orientated at 90 degrees to one another in a 'V' formation. The belt speed is fixed at 4 inches per second (50hz).
